AMTEC MACHINERY (T) LTD

AMTEC MACHINERY (T) LTD

Established in 2015 to provide with what is needed to the world of heavy equipments spare parts. Amtec Machinery imports and sale spare parts in order to cater to its reputed clients in both, local and international markets, thus classifying it as a recognized supplier in the arena

VISSION

To be a leader of supplying heavy equipments spare parts, both in the local and international markets

MISSION

We are committed to provide to our Esteem Customers, the Right products and services at the Right time at the Right place with zero tolerance.

OUR products and services range we deal with

Amtec need to be a leader of Supplying Best Quality - Best Value Products and Services of Heavy equipment and Power Generation, spare parts, for **Caterpillar, Komatsu, Volvo, JCB, Perkins,**

TRACK ADJUSTER

Amtec offers a wide range of complete track adjuster assemblies for use on a wide range of popular excavator applications. Maintaining proper track tension is critical to receiving satisfactory track life. Adjuster are designed to absorb shock, provide proper track tension and project idlers and track systems.

Our adjusters are engineered to provide proper tension, excellent services in demanding applications and extreme operating conditions. Manufactured to rigid quality standards and inspected to ensure a proper fit and function in the field.

TRACK GUARDS

Track guards protect rollers and links from damage and deformation. They are designed primarily for use in high-impact underfoot conditions. They keep out large rock and material preventing the overload to undercarriage to reduce wear and damage.

OUR products and services range we deal with

RECOIL SPRINGS

Amtec recoil springs for a wide range of excavators and dozers. The recoil springs included in the track adjusting assembly helps in maintaining a proper required tension on the track chain assembly.

BUCKET

Amtec offers a product line that covers a wide range of all applications. Our buckets designed and manufactured from high strength abrasion and wear resistant steel provide the best resistance and wear life. Our full range of excavator buckets suit up to 110 tones class machines.

OUR products and services range we deal with

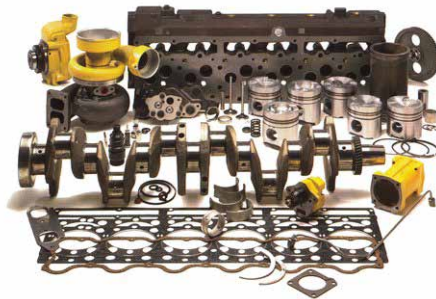

REPAIR PARTS

Our repair parts coverage is considered the most extensive and complete product range of repair items available in the market. Throughout the last years, repair parts coverage has grown and expanded through customers demand, constant market analysis and strategic acquisitions.

PRODUCT RANGE

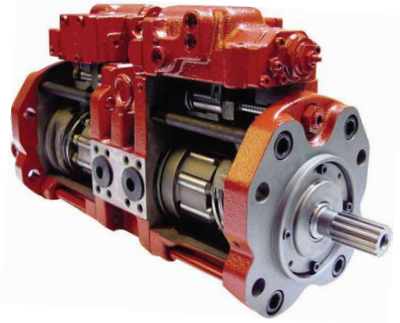

Amtec is well known for providing the most extensive coverage of repair parts in the industry. The product range includes engine parts, hydraulic parts, and filtration components, transmission, final drive parts along with frame parts.

OUR products and services range we deal with

HYDRAULIC PUMP PARTS

Our range of hydraulic parts and components which includes pumps, motors and their repair parts like cylinder block, piston shoe sub assembly, shafts, valve plates, seal kits of popular models like Kawasaki, komatsu, caterpillar, uchida, rexforth, Eaton, kayaba (Hitachi)

HYDRAULIC SEAL KITS

Hydraulic seals are made of Teflon and rubber and are used in construction equipment. They are developed for used hydraulic cylinder market.

The seal kits includes rod seals, buffer rings and dust seals which perform the most important function of preventing dust contamination and any leakage in the hydraulic circuits of construction equipment.

OUR products and services range we deal with

TYRES

Amtec pioneers in parts for tracked equipment's introduces new product line for wheeled equipment's off-the-road tyres.

Our tyres are special designed for rough terrains, our product range covers complete construction and mining sector needs.

Rigid quality control covers every phase of the manufacturing process form testing the raw materials to the final product.

Tires ensures durable casing, stable compounds, environment based treads which provide solid traction, long life and excellent resistance to impact punctures.

Our professional expertise are dedicated in guiding you to choose the right tyre, cut out for the specific application at the highest level of customer satisfaction and after-sales support.

OUR products and services range we deal with

FILTERS

Air filter - it prevents contamination of intake air which mixes with fuel before combustion
Oil filter - Provides clean lubricant oil thus reducing premature wear and tear in all frictional parts (piston, cylinder) thus giving maximum fuel economy.
Fuel filter-Keeps fuel clean which will prolong injector life and maintain higher fuel efficiency.
Transmission filter-it ensure that transmission fluid is lean and the transmission box clog free for better performance.
Coolant filter - Keeps coolant system clean.
Also available are air / oil separator & fuel / water separator.

LUBRICANTS

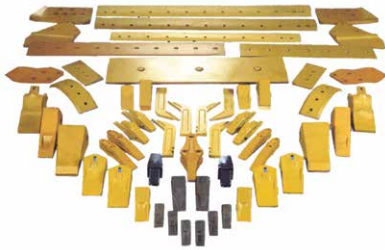

Our lubricants and Greases, Amtec has now in range the Engine Oils, Transmission fluids, Gear Oils, Hydraulic Oils, Coolants & Greases for the complete range of construction equipments.

OUR products and services range we deal with

GROUND ENGAGING TOOLS

Top quality ground engaging tools make a big difference in how well your machine performs.

Amtec offers top quality ground engaging tools for all heavy equipment such as loader, excavator, backhoe, dozers, motor grader. We are proud to offer high quality ground engaging tools with the latest designed shapes of outstanding performance and value in a wide range of applications. Whether you are in the business of construction, excavation, mining or any other earth moving enterprise the value you demand for your money can be found in amtec ground engaging tools.

UNDER CARRIAGE PARTS

Undercarriage parts and components work as a system to move the machine in any type of terrain.

Amtec provides high quality undercarriage parts to keep your heavy machinery running productively without delays. Undercarriage parts can account for a large amount of the repair investments you make over the life of the machine. For this reason Amtec offers the highest quality undercarriage replacement parts while giving customers the ability to obtain significant savings to reduce repairs cost on their machine.
